

## RN11H & RN11HT Visit Changes

- **Who?** RNs
- **What?** A new question has been added regarding the patient/family's ability to administer medications.
- **Where?** RN11H & RN11HT visits
- **When?** Go Live is July 1, 2024
- **How?** The following question has been added to the Physical Assessment > Safety/Environment section of both the RN11H & RN11HT visits: "Is the patient/family able to administer medication safely and competently?".
- **Why?** This question is necessary to bring us into compliance with Joint Commission standard MM.06.01.03 EP7, which requires documentation that we have validated whether patients and families can safely and competently administer medications. If 'No' is selected, you **must** add Medication Safety as a problem on the plan of care with goals and interventions individualized to the patient/family needs regarding medication administration.
